Sprint 4 Report, TCG Tracker, 12/03/24

- **Actions to stop doing**
  - None
- **Actions to start doing:**
  - None
- **Actions to keep doing:**
  - Keep good communication when completing tasks
  - Unofficial calls to discuss functionality changes
- **Work completed/not completed:**
  - Everything was completed for the sprint. The only issues we have are minor bugs with the following:
    - Search bar on the collection page: cursor issue where it stops focus after typing one character, you have to click every time you type a letter
      - Using "autofocus" to fix it gives another bug where the user's page gets sent to the top of the screen when you select cards
    - Some cards are not processed properly by the image processing, usually older cards with different formats ~5-15% of cards have this issue
- **Work completion rate**
  - 3/3 user stories complete
  - 100% completion rate
